**DETAILED ACTION**

1. The Office has withdrawn all objections and rejections raised in the Non-Final Rejection mailed 6/28/2010.

***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Fred Pruner, Reg. No. 40,779, on Dec. 14-15, 2010.

**The application has been amended as follows:**

**In the claims:**

3. Amend claims 7 and 24, as follows:

7. (Currently amended) The ~~[[A ]]~~method of document transformation as described in Claim 6, further comprising:

matching said source node to said target node having a synonymous label to achieve said match.

24. (Currently amended) The ~~[[A ]]~~computer system as described in Claim 23, wherein said method further comprises:

matching said source node to said target node having a synonymous label to achieve said high quality match.

***Reasons For Allowance***

4. The cited references do not disclose generating a sequence of transformation operations that transforms a source tree model of a source XML document to a target tree model of a target XML document based at least in part on data loss costs associated with the transformation operations, translating the sequence of transformation operations into an equivalent XSLT transformation script, and using the transformation script to transform from a source to a target XML document.

It is further noted that the Examiner interprets the claimed method steps as being performed by a hardware-based computer system executing software, in accordance with Specification. For example, see Figure 9 showing a block diagram of a server operating in a networked environment, and the Specification passage at page 8 lines 20-25 discussing transformation operations as being performed by a computing device, such as a server or a standalone machine. Additionally, the Specification does not include the method being performed manually, on paper or via mental steps.

5. After a thorough search, and in light of the prior art of record, claims 1, 3-18 and 20-26 (renumbered as 1-24) are allowed.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2162

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
